GENERAL PRICING

Our philosophy is to make interpretations available for free for all Users.

We apply a low startup fee and a monthly recurring fee for customers to set up, host and operate their channels and organize, supervise and help their events. Our general startup fee is EUR 200 per channel, and our monthly fee is EUR 100 per Channel. With our low platform prices, we would like to encourage Customers to create more and more live events in different languages, so people around the World will not only see their live happenings, and partly or not understand their messages, but together we can make them understand.

Interpretation fees are quoted by the interpreters registered on our platform. When a Customer creates a live event and requests interpretation service, we will provide a budgetary price sum for the interpretations, based on the average interpretation prices registered by our interpreter partners in their profile. However, interpretation offers for the concrete project might be different from the average, based on the time, duration or topic of the event. Customers can always accept or decline every offer for the interpretation language by language.
